

TL60 SKID

MORRIS
SITE MACHINERY

Small, smart and adaptable.

The compact SMC TL60 Skid is the latest lighting innovation from Morris Site Machinery. Easily transportable, the TL60 is small in size and footprint, but big on output.

The four powerful 320W LED lights provide in excess of 130,000 lumens. The Skid is available with a 2.1 kVA diesel generator and weighs in at 385kg (fully fuelled). There are also options to operate from the mains, 110V sockets or a linked lighting process with inlet and outlet sockets.

The new light has a 355° mast rotation, manual winch, two extendable legs and three wind down stabilisers, making it the ideal compact solution for illumination.

The machine comes with fork pockets and a lifting eye for ease of transportation to/from and around site. The TL60 Skid can be adapted to fit to a Road tow trailer to give another option if required.

BUILT TO PERFORM

SPECIFICATION

Generator (optional)	Coelmo DVLM1
Engine	Yanmar L70N Air-Cooled 3000 rpm
Alternator	Mecc Alte S16W-105/2
Continuous Power / Standby Power	2.1 kVA / 2.2 kVA @ 0.8PF
Voltage	230V
Fuel Tank Capacity	10.5 Litres (Coelmo DVLM1 generator)
Noise Level @ 7 Metres	71 dB(A) approx.
Fuel Consumption (lamps only)	0.65 l/hr (estimated)
Maximum Run Time (4 Lamps Only)	16 hrs
Power Outlet Sockets	2 x 16 Amp, 230V
Mast Maximum Height	5640mm, Zinc Plated
Number of Mast Sections	4
Mast Rotation	355° (Manual)
Mast Erection	Manual Winch (Automatic brake)
Lamp Specification	4 x 320W LED
Stabilisers	3 Wind Down
Fork Pockets	Entry from side
Dimensions for Transport (W x L x H)	800mm x 1600mm x 2150mm (Lamp bar horizontal)
Dimensions Fully Deployed (W x L x H)	1315mm x 2140mm x 5640mm
Weight	385kg (Fully fuelled)
OPTIONS	
Mains Supply	110V / 230V
Link Lighting	Inlet & outlet sockets to suit requirement
