

TL60 TROLLEY LIGHT

MORRIS
SITE MACHINERY

Small, smart and sophisticated.

The compact SMC TL60 Trolley Light is the latest lighting innovation from Morris Site Machinery. Easily transportable and developed to be handled by a single operator, the TL60 is small in size and footprint, fitting through a standard internal doorway, but big on output.

The four powerful 320W LED lights provide in excess of 130,000 lumens. The Trolley Light is available as a unit excluding generator or with a 2.1 kVA diesel generator. Weighing in at 325kg (with generator) it can easily be transported on a vehicle with a 500kg tail lift. There are also options to operate from the mains, 110V sockets or a linked lighting process with inlet and outlet sockets.

Complete with retractable handles which extend and slide to allow compact transport and storage, the new light has a 355° mast rotation, manual winch, two extendable easy wind down stabilisers and one drop down stabiliser, making it the ideal compact solution for illumination indoors* and out.

*Do not use engine power indoors without suitable exhaust extraction.

BUILT TO PERFORM

Specification

Generator (optional)	Coelmo DVLM1
Engine	Yanmar L70N Air-Cooled 3000 rpm
Alternator	Mecc Alte S16W-105/2
Continuous Power / Standby Power	2.1 kVA / 2.2 kVA @ 0.8PF
Voltage	230V
Fuel Tank Capacity	10.5 Litres (Coelmo DVLM1 generator)
Noise Level @ 7 Metres	71 dB(A) approx.
Fuel Consumption (lamps only)	0.65 l/hr (estimated)
Maximum Run Time (4 Lamps Only)	16 hrs
Power Outlet Sockets	2 x 16 Amp, 230V
Mast Maximum Height	5640mm, Zinc Plated
Number of Mast Sections	4
Mast Rotation	355° (Manual)
Mast Erection	Manual Winch (Automatic brake)
Lamp Specification	4 x 320W LED
Stabilisers	2 Wind Down / 1 Drop Down Jack
Fork Pockets	Entry from end
Dimensions for Transport (W x L x H)	800mm (minimum) x 1500mm x 2150mm (Lamp bar horizontal)
Dimensions Fully Deployed (W x L x H)	1315mm x 2040mm x 5640mm
Tyres	4.80/4.00-8
Axle Position Adjustable	To facilitate different generators
Weight (excluding generator)	200kg
Weight (including generator)	325kg (Fully fuelled)
OPTIONS	
Mains Supply	110V / 230V
Link Lighting	Inlet & outlet sockets to suit requirement
Fork Pockets	Entry from all 4 sides
